As illustrated in the graph above, the point at which total fixed and variable costs are equal to total revenues is known as the break even point. At the break even point, a business does not make a profit or loss. Therefore, the break even point is often referred to as the "no-profit" or "no-loss point." The break even analysis is important to business owners and managers in determining how many units (or revenues) are needed to cover fixed and variable expenses of the business.

There is one more difference between the financial break-even point and operating or accounting break-even point. The latter calculates the unit sales that a firm needs to achieve for zero operating margins. Financial break-even, on the other hand, deals with the bottom line of the company's income statement. Or, we can say, financial break ...
