From Risk To
Survivorship

There are approximately 1 million LGBT cancer survivors in the country today. This is based on the common estimate that approximately 4% of the population is gay, lesbian, bisexual and/or transgender and that this population

Download Ebook Cancer

is overrepresented among cancer survivors. Nearly every doctor has LGBT people as patients.

Tobacco is the leading cause of cancer-related deaths, so it's important to get help to quit.

“Research shows that members of the LGBT community are more likely to smoke or use other forms of tobacco
