You'll learn how it interfaces with the database and other applications in the most efficient manner.

Oracle Database 11g Advanced PLSQL | Advance PL/SQL Training

Dynamic SQL is a programming methodology for generating and running SQL statements at runtime. It is useful when writing general-purpose and flexible programs like dynamic query systems, when writing programs that must run database definition language (DDL) statements, or when you do not know at compile time the full text of a SQL statement or the number or data types of its input and output ...
