The Metaphysics of Time, Space and Architecture Time, space and matter can fuse together in great architecture to allow for deep human experiences. In fact, time can literally and perceptually slow down under the right spatial conditions and this may provide an antidote to our instantaneous, speed-driven contemporary lives.

The claim is that Space, Time and Architecture is an influential resource for the understanding of how modern architecture is written about in the first half of the twentieth century. The proof of this influence is both the written sources on the book and its rule in Manfredo Tafuri's formulation of „operative criticism?.

Originally published in 1941, Space, Time and Architecture came out of a series of lectures the Swiss art historian delivered at Harvard in 1938 and 1939. The Charles Eliot Norton Lectures enabled Giedion to explore the contemporary architecture of (primarily) Europe through an examination of historical precedents.
